

 **MEDI-GAZE >>>**

SAVE TIME , SAVE LIFE

MEDI-GAZE

WHY WE NEED THIS PROJECT ?

- Not every time we are lucky enough to get medicine of exact same name as required.
- It takes too much time to search any specific medicine.
- On urgent basis it becomes important to know where to look for our medicine, we can't waste time searching in every medical shop.

AIM OF OUR PROJECT

- To provide information about availability of **specific medicines** at our nearest medical shop.
- It works as **time savior**, by this user don't have to roam from shop to shop in search of specific medicines.
- Get details of medicine in few minutes.
- **Free delivery** option is also available for some sellers.
- Users would be made aware of **15% discount** on allopathy medicines.

REVENUE MODEL

- After a successful launch of our project ,we would start **advertising** the ads of advertisers.
- We would also provide **delivery options** in place of those sellers who don't provide it.
- **Premium membership** option would be made available for sellers, intending to rank their stores.

REVIEWS OF OUR CLIENTS

- Our clients responded in an amazing way, all of them were ready to join with us ,saying "it's a win win deal, and wanted to join our app" (bharat medical, near minal mall)
- For them it is an source of extra income and surplus profit(nursing home care, minal gate no.1)
- They requested us to bring this app in playstore asap.

Functioning of our idea

- Our first step would be to launch our website containing our details, our app's details, meant to promote us on google.
- Then we would launch our app on playstore and appstore.
- Then we would keep on increasing its features.
- Then if things go accordingly we would start delivery services in place of retailers who don't provide delivery services.

Functioning of our app

- User will have to select their area range where they have to find their medicine as per their convenience.
- Then user have to enter the name of the medicine they want to buy.
- Then a message would be shown on retailer's app within that area with three options:
 - i. Same medicine available.
 - ii. Not same but of the same composition.
 - iii. Not available.
- Then the retailer responses to the message, and response time would be within 1 hours, after that the message would be vanished automatically.

Functioning of our app

- After that user would be given a list of retailers who have medicines of same name or of same composition.
- Then we will also provide information of retailer to our users like:
 1. Address
 2. Contact no.
 3. Free delivery (yes or no)
- Then users would be free to choose where to buy his medicine.

ROLES OF EACH MEMBERS

- **WEB DEVELOPER – AMIT , SANGAM**
- **APP DEVELOPER – JEET , VIJAY , ADARSH**
- **DATA MANAGER – ADARSH , SANGAM**
- **MARKETING – AMIT , JEET**

Thank You
